THE practical operation of our fox bounty law is shown thus: A boy captured eleven foxes and desired to keep them as household pets, and at the same time desired to secure the bounty of fifty cents per head. The boy was greatly taken aback when he was informed that the animals must be killed before he could have a valid claim to this bounty.

As Mr. and Mrs. Francis Raymond of Mendon were returning from church, recently, they were thrown from the carriage by the breaking of a king-bolt and sustained serious injuries. Mr. Raymond's left shoulder was dislocated and his wife's right arm broken. Both were severely bruised and cut by the frozen ground. As the couple are about sixty years of age their escape from fatal injuries was fortunate.

THE other night Charles Rice, a Bennington jeweler, while full of that which cheers, and inebriated, was abusing his family and making a general racket. Two policemen were called in and Rice fired upon them, the ball just grazing the thigh of Officer Hurley. JAMES ROBY of New Bedford, Mass., was loading a car at North Troy on Tuesday, December 11, when he was taken by a sudden illness. A Paper Loyal and True.

New York City, with its suburbs, now forms a great center of population, amounting in all probability to over 2,500,000. It might be a republican city in a few years, with steady fighting and straight voting, because it is now the largest manufacturing center in the United States; but at present it is heavily democratic. The necessary influence of importing and trading elements in the metropolis has prompted every other old newspaper there to abandon the defense of American interests and to assail the policy by which the welfare of American labor is promoted; but *The Tribune* has remained loyal and true, and has earnestly represented the convictions of the great majority of voters in the loyal north during the presidential campaign. To its remarkable work in arousing the minds of the people, a generous share of the great victory of November 6th is undoubtedly due. *The Tribune* is a useful, able and interesting national paper. Among its special features the past year have been energetic agitation in favor of better protection to farmers, a service pension to Union veterans, and the right of every American to a good living undisturbed by foreign competition. These will all be continued. *The Tribune* office produces one of the best family papers in the country, and it is largely taken, even by democrats, for its excellence in this respect. There is no better all-around general newspaper published. Its prospect a will be found in another column. New readers get the paper until January 1, 1890.
